

A photograph of a modern, dark-colored building with the word "Addverb" illuminated in white on its facade. The sky is blue with light clouds. A large, curved graphic element in shades of blue and red sweeps across the top and right side of the page.

# Addverb

## ABOUT US

Addverb Technologies is a global Robotics & Intralogistics Automation company and we are making motion smarter. We are unlocking the true potential of automated systems through the synergy of our in-house manufactured hardware and robust software enabling us to be at the forefront in the domain of robotics automation.

## OUR JOURNEY

Established in 2016, Addverb was born in India to improve supply chain operations by automating the arduous tasks related to storage and movement of goods.

The biggest challenge was to reach a speed at which technology is disrupting the supply chain. Over this period of time, we have established ourselves as a reliable automation partner by leveraging the power of robotics and evolving with the transforming technologies.

## OUR VISION

Touching lives by pioneering human-robot collaboration.

## OUR TEAM

We are a multi-disciplinary Team of **400** engineers with **55+** people dedicated to R&D

# REIMAGINING MOTION FOR

Motion Reimagined.

## ROBOTICS

Autonomous Mobile Robot  
Sorting Robot  
UV Disinfectant Robot  
Pallet shuttle Robot  
Carton shuttle Robot

## ASRS

Crane based ASRS  
Shuttle based ASRS  
All conveying systems

## SOFTWARE

WCS  
WMS  
FMS

## PICKING TECHNOLOGY

Pick to Light  
Pick by Voice  
Pick by Vision

## PICKING ROBOTS

Mobile Picking Vehicle  
Bin picking Robot  
Robotic Palletisation  
Pick and Place Robot

**GEOGRAPHICAL PRESENCE**  
**5+** countries

Offices in:  
India | Singapore | The Netherlands | Australia
