Future Of Automation! Addverb's Trio Of Robots Pave Way For Industry Transformation

Addverb, a global leader in robotic and automation solutions, has announced a trio of groundbreaking robots at LogiMAT India 2024, signaling a paradigm shift in efficiency, safety, and adaptability across industries. Among the innovations is Trakr, India's inaugural Assisted Mobile Robot (AMR), a sleek, compact, and agile robot designed for material handling and logistics. Another innovation is the Dog robot, engineered for agility and perception. With autonomous operation capabilities, the Dog robot excels in diverse sectors such as construction, oil exploration, defence, and security, proving invaluable in facility inspections, patrols, and surveillance.
